[PROJECT-BASED ENGAGEMENT]

Undergraduate Senior Design

In Senior Design, you are presented with an opportunity to work with a team of undergraduate students to provide your organization with a variety of innovative and creative solutions to a problem. Student teams work on well-defined, specific design projects to generate, evaluate, and communicate solutions to their client.

For more information about Senior Design, please contact:

Dima Nazzal, *Director of Professional Practice*
dima.nazzal@gatech.edu

Master of Science in Supply Chain Engineering

Capstone Industry Experience

The summer term is dedicated to the Capstone Project in which students identify and define a supply chain design and/or analysis problem to be addressed with quantitative modeling.

For more information about the MS SCE Capstone Project, please contact:

Tim Brown, *Managing Director for Supply Chain & Logistics Institute*
tim.brown@isye.gatech.edu

Master of Science in Analytics

Capstone Experience – Applied Analytics Practicum

At the conclusion of the program, students work in cross-disciplinary teams on a significant analytics project that companies and organizations bring to campus.

For more information about the Analytics Capstone, please contact:

Joel Sokol, *Professor and Director of the Master of Science in Analytics Program*
jsokol@isye.gatech.edu
