

# Signature Supply Chain Certificates

## Procurement and Supply Management Leadership (PSM) Certificate

Prepares sourcing, planning, and procurement professionals to successfully lead in navigating the complexities, risks, and rewards of the global sourcing environment. Featured course topics are negotiation skills, bid package development, supplier selection, and contracting excellence. Critical professional skills developed include identifying, implementing, and managing opportunities to reduce the total landed cost of material.

- Category Management and Sourcing Leadership
- Contracting and Legal Oversight
- Essentials of Negotiations and Stakeholder Influence
- One elective
