

Lean Six Sigma Yellow Belt (Online/Self-paced)

Build a foundation in process improvement by mastering Lean Six Sigma principles to identify waste, enhance quality, and drive lasting operational efficiency.

COURSE DESCRIPTION

This course serves as a solid first step in providing you with insight into the Lean Six Sigma competency area. With this foundation and appreciation of the competency, you may choose to pursue further training on specific statistical techniques and other aspects of Lean Six Sigma while beginning to apply Lean thinking in your daily operations. You'll develop an understanding of what is involved in becoming a Lean Thinker, understand the purpose of Lean and Six Sigma, learn to see waste and problems, and connect to customer value.

WHO SHOULD ATTEND

Individuals who want to improve their company's processes and bottom line using the Lean Six Sigma approach or are interested in understanding the role of Lean Six Sigma as a competency for further educational pursuits.

WHAT YOU WILL LEARN

- How to see waste and problems, and connect to customer value
- The purpose of Lean and Six Sigma
- What is meant by a Lean Enterprise System
- Process Entropy and PDCA (Plan-Do-Check-Act)
- Customer value and the eight wastes
- How to define a problem with emphasis on eliminating waste
- Root cause identification
- The components of Lean thinking and Six Sigma

COURSE FEES
