Custom Corporate Training & Events

Corporate training is key to sustainable supply chain management and organizational success.

Georgia Tech Supply Chain & Logistics Institute (SCL) conducts tailored corporate training programs around the globe to assist companies in improving employee skills in supply chain domain knowledge, innovation, and leadership development. Whether you’re looking to equip your employees with essential professional and technical skills, bring customers and/or suppliers together for collaborative planning and education sessions, or conduct supply chain educational events for management and employees, SCL can tailor on-site and off-site training to fit your organization’s needs. The programs are highly customized and include a mix of lectures, team projects, soft skills development, and online self-study as needed.

Contact Tim Brown, timbrown@gatech.edu, for more information about custom training programs, lectures, and events.

Introduction to International Logistics and Compliance

Enhance your skills and knowledge in Global Trade Management

Attendees tour the Port of Savannah

COURSE DESCRIPTION

This global trade course provides knowledge needed by international logistics managers to work within the global supply chain, and facilitate the movement of goods efficiently between countries. The course focuses on incoterms, global trade compliance, harmonized tariff schedules, U.S. import and export regulations, U.S. Free Trade Agreements, and supply chain security. Attendees will also tour the Port of Savannah!

THIS COURSE WILL ENABLE YOU TO

• Develop competency in the structure, content, and classification of goods within the Harmonized Tariff Schedule of the United States (HTSUS)
• Identify methods for valuing merchandise
• Understand the types of customs entries and transportation security protocols
• Learn about special duty programs and multi-modal port operations
• Recognize commercial invoice requirements
• Gain familiarity in U.S. Free Trade Agreements

COURSE TOPICS

• Introduction to incoterms
• Introduction to HTS structure & content
• Classification of goods under the HTSUS
• Types of customs entries
• Special duty programs
• Commercial invoice requirements
• Essentials of container movements
• Transportation security protocols
• U.S. Free Trade Agreements
• Comparison of cost and service performance of transportation modes
• Issues and future trends in global logistics

Lean Inbound Logistics

Streamline inbound material processes to improve your balance sheet and customer satisfaction

Attendees tour the Port of Savannah

COURSE DESCRIPTION

Rising transportation costs, increased customer demands, and globalization continue to add pressure on today’s supply chain managers and the need to reduce costs while maintaining high customer satisfaction. For many, the solution is to bring lean principles into the inbound logistics process, allowing for better synchronization of suppliers, transportation providers, and other supply chain partners. Lean inbound logistics can help you improve the flow of materials and your overall costs while ultimately providing better quality service to your customers.

This course focuses on the why and how to apply lean principles to all aspects of your current inbound logistics network, including transportation, suppliers, and materials. By developing lean strategies, identifying operational realities, and learning new tools for implementation, participants will be able to balance inventory costs with transportation costs, improve leadership’s understanding of the supply chain, and design a better network based on lean principles. Attendees will also tour the Port of Savannah!

THIS COURSE WILL ENABLE YOU TO

• Map your current network and design a future-state network based on lean principles
• Synchronize transportation, suppliers, and materials to improve flow and reduce costs
• Learn the keys to strategic supplier management
• Appreciate the distinct nature of the inbound logistics network as a link to suppliers and manufacturing facilities, and part of the overall value chain
• Explore Milk Run development and mode selection

COURSE TOPICS

• Strategic value of lean inbound logistics and total logistics cost
• Getting started – the current state map
• Lean logistics network design – the desired state and planning for implementation
• Material ordering and supplier management
• Lean logistics engineering and transportation management
• Yard control and material receiving
• Implementing, sustaining, and improving
