

LEAD THE WAY IN SUPPLY CHAIN

LEAN SUPPLY CHAIN PROFESSIONAL CERTIFICATE

Develop, lead, and implement strategic and tactical elements of lean principles in your company's supply chain.

This three-course certificate is focused on problem identification and problem solving at the root cause. The certificate program is taught to be easily understandable and immediately applicable, by educators who are also supply chain leaders. Experience exercises, simulations, and activities that help transform the way you think, act, and lead. Register today for all three courses and become an impactful leader within your organization!

TAKE ALL THREE COURSES AND EARN YOUR CERTIFICATE!

Course
1

Lean Essentials for the Supply Chain Professional

3-Day Course

Understand the thinking behind lean and see your operations from a new vantage point.

Learning the fundamentals is the first step in advancing your supply chain. In this first course, explore the principles and tools of lean thinking and see your operations from a new vantage point. From concepts like standardization and process thinking, to tools like value stream maps and dashboards, you will gain the skills and problem-solving tools necessary to identify and eliminate waste at the root cause.

Course
2

Lean Implementation for the Supply Chain Professional

3-Day Course

Apply lean principles to advance your supply chain.

Connecting lean and waste reduction to supply chain management functions achieves improved inventory visibility, logistics control, and optimal supply chain performance. In this course, you will learn how to apply pull systems, leveled flow, and waste reduction strategies to your supply chain. Simulations and application exercises will train you how to think from a “systems” perspective to reduce the total cost of fulfillment. Upon course completion, you will take away the strategy and tactics to implement your lean supply chain.

Course
3

Lean Leadership for the Supply Chain Professional

3-Day Course

Two formats:  In person or online!

Build and sustain your lean culture.

While the first two courses in the series focus on strategic and tactical implementation of the lean supply chain, this final course focuses on transforming an organization’s culture from traditional to lean thinking. Learn to navigate through the waters of change management to successfully execute and sustain the lean supply chain journey. Upon course completion, you’ll be ready to embrace the lean leadership that builds, manages, and sustains a lean organization. This course is also available in a self-paced, online format.

MAKE LEARNING LEAN A TEAM EXPERIENCE!
